

Florida Municipal Investment Trust

ADMINISTERED BY THE FLORIDA LEAGUE OF CITIES INC.

To: Participants in the Florida Municipal Investment Trust
From: Administrator, Florida League of Cities Inc.
Date: December 1, 2016
Subject: GASB 72, Fair Value Measurement and Application (Effective FY 2016)

In February 2015, the Governmental Accounting Standards Board (GASB) issued Statement 72, *Fair Value Measurement and Application* (GASB 72). GASB 72 amends the definitions of both fair value and investments, provides guidance for determining a fair value measurement for assets and liabilities required to be reported at fair value, provides guidance for applying fair value to certain investments, and provides additional disclosure for all fair value measurements. GASB 72 is effective for periods beginning after June 15, 2015.

This memo provides information on investments in the Florida Municipal Investment Trust (FMIvT) for your governmental entity's reporting requirements relating to GASB 72 as of September 30, 2016. Please refer to GASB 72 for reporting and disclosure requirements in addition to those discussed in this memo.

The FMIvT, administered by the Florida League of Cities, Inc., is an interlocal governmental entity created under the laws of the State of Florida. The FMIvT is an Authorized Investment under Sec. 163.01 Florida Statutes. The FMIvT is a Local Government Investment Pool (LGIP) and is considered an external investment pool for GASB reporting purposes. Your government owns shares in one or more FMIvT portfolios. Your government's investment is the FMIvT portfolio, not the individual securities held within each FMIvT portfolio.

GASB 72 requires governments to disclose the fair value hierarchy for each type of asset or liability measured at fair value in the notes to the financial statements. The standard also requires governments to disclose a description of the valuation techniques used in the fair value measurement and any significant changes in valuation techniques. The new disclosures are in addition to the disclosures currently required by GASB Statements No. 3, 31, 40, and 53 and should be organized by type of asset or liability instead of reporting entity segment.

GASB 72 establishes a three-tier fair value hierarchy:

Level 1 Inputs – directly observable, quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 Inputs – inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. These inputs are derived from or corroborated by observable market data through correlation or by other means.

Level 3 Inputs – unobservable inputs used only when relevant Level 1 and Level 2 inputs are unavailable.

The level in which an asset is assigned is not indicative of its quality but an indication of the source of valuation inputs.

Disclosure Information

To meet the objectives of GASB 72, the following information has been prepared for each FMIvT fund or portfolio. Please refer to your FMIvT account statement for fair value (net asset value).

FMIvT 0-2 Year High Quality Bond Fund

This fund invests mainly in US government and agency securities and asset-backed securities. The underlying securities have observable level 1 quoted pricing inputs or observable level 2 significant other observable pricing inputs. Most of the security prices were obtained from a pricing service, Interactive Data Corporation (IDC). While the underlying asset values are based on quoted prices or market-corroborated inputs, the net asset value of the portfolio is not publicly quoted. Members should consider reporting these shares as level 2, since the value is based on market-corroborated data.

FMIvT 1-3 Year High Quality Bond Fund

This fund invests mainly in US government and agency securities and asset-backed securities. The underlying securities have observable level 1 quoted pricing inputs or observable level 2 significant other observable pricing inputs. Most of the security prices were obtained from a pricing service, Interactive Data Corporation (IDC). While the underlying asset values are based on quoted prices or market-corroborated inputs, the net asset value of the portfolio is not publicly quoted. Members should consider reporting these shares as level 2, since the value is based on market-corroborated data.

FMIvT Intermediate High Quality Bond Fund

This fund invests mainly in US government and agency securities, asset-backed securities and corporate bonds and notes. The underlying securities have observable level 1 quoted pricing inputs or observable level 2 significant other observable pricing inputs. Most of the security prices were obtained from a pricing service, Interactive Data Corporation (IDC). While the underlying asset values are based on quoted prices or market-corroborated inputs, the net asset value of the portfolio is not publicly quoted. Members should consider reporting these shares as level 2, since the value is based on market-corroborated data.

FMIvT Broad Market High Quality Bond Fund

This fund invests mainly in US government and agency securities, asset-backed securities and corporate bonds and notes. The underlying securities have observable level 1 quoted pricing inputs or observable level 2 significant other observable pricing inputs. Most of the security prices were obtained from a pricing service, Interactive Data Corporation (IDC). While the underlying asset values are based on quoted prices or market-corroborated inputs, the net asset value of the portfolio is not publicly quoted. Members should consider reporting these shares as level 2, since the value is based on market-corroborated data.

FMIvT High Quality Growth Portfolio

This portfolio invests mainly in domestic stocks. The majority of the underlying securities have observable level 1 quoted pricing inputs. Most of the security prices were obtained from a pricing service, Interactive Data Corporation (IDC). While the underlying asset values are based on quoted market prices, the net asset value of the portfolio is not publicly quoted. Members should consider reporting these shares as level 2, since the value is based on market-corroborated data.

FMIvT Diversified Small to Mid Cap Equity Portfolio

This portfolio invests mainly in domestic stocks. The majority of the underlying securities have observable level 1 quoted pricing inputs. Most of the security prices were obtained from a pricing service, Interactive Data Corporation (IDC). While the underlying asset values are based on quoted market prices, the net asset value of the portfolio is not publicly quoted. Members should consider reporting these shares as level 2, since the value is based on market-corroborated data.

FMIvT Large Cap Diversified Value Portfolio

This portfolio invests mainly in domestic stocks. The majority of the underlying securities have observable level 1 quoted pricing inputs. Most of the security prices were obtained from a pricing service, Interactive Data Corporation (IDC). While the underlying asset values are based on quoted market prices, the net asset value of the portfolio is not publicly quoted. Members should consider reporting these shares as level 2, since the value is based on market-corroborated data.

FMIvT Russell 1000 Enhanced Index Portfolio

This portfolio invests in a single underlying fund, the Intech U.S. Broad Enhanced Plus Fund, LLC (Intech Fund), shares of which are not publicly quoted. The Intech Fund invests mainly in domestic stocks, all of which have observable level 1 quoted pricing inputs. The value of the portfolio's shares of the Intech Fund investment are determined based on the net asset value provided by the Intech Fund, which was calculated in accordance with generally accepted accounting principles. Members should consider reporting these shares as level 2 since the value is based on market-corroborated data.

FMIvT International Equity Portfolio

This portfolio invests in a single underlying fund, the Investec International Dynamic Equity Fund, LLC (Investec Fund), shares of which are not publicly quoted. The Investec Fund invests in stocks sold on U.S. and international exchanges, all of which have observable level 1 quoted pricing inputs. The value of the portfolio's shares of the Investec Fund investment are determined based on the net asset value provided by the Investec Fund, which was calculated in accordance with generally accepted accounting principles. Members should consider reporting these shares as level 2 since the value is based on market-corroborated data.

FMIvT Core Plus Fixed Income Fund

This fund invests in two underlying funds, the Franklin Templeton Global Multi-Sector Plus Fund, LP and the Pioneer Institutional Multi-Sector Fixed Income Portfolio, LLC. Shares of these funds are not publicly quoted. These underlying funds invest in a variety of financial instruments, including equity investments, asset-backed securities, debt securities, swaps, forward exchange contracts, credit-linked notes, escrow accounts, litigation trusts for both U.S. and foreign companies and governments. Members should consider reporting shares of this fund as level 3 since the value is based on unobservable inputs.

FMIvT Expanded High Yield Bond Fund

This fund invests in a single underlying fund, the Oaktree Expanded High Yield Fund, LP (Oaktree Fund), which in turn, owns two underlying funds, holding high-yield debt securities issued by U.S. and foreign companies. The Oaktree Fund and the underlying funds are not publicly quoted. Many of the securities held by the underlying funds are valued based on unobservable inputs. Members should consider reporting shares of this fund as level 3 since the value is based on unobservable inputs.

FMIvT members are responsible for ensuring their investments are properly valued and reported. In addition to considering the information contained in this memo, you should consult your entity's accountant, auditor or counsel.
